

Youth Philanthropy New Zealand

Generation Give

Info to applicants

Generation Give is a Youth Philanthropy Programme, where selected students spend 20 sessions over 20 weeks, learning essential skills from proven leaders to further their professional careers. In short, every Monday, you will be exposed to a new topic ranging from; Marketing, Governance, Entrepreneurship, and 17 others.

On each of those weeks, a guest speaker prominent in that specific field will deliver an informative discussion and answer any questions from you and members of the committee. After learning all of these skills, Generation Give offers you the opportunity to apply your newfound knowledge to the community around you. Through the combined effort of the Generation Give committee and YPNZ (Youth Philanthropy New Zealand), over \$10,000 will be fundraised. The responsibility of where to direct that money in your community, will fall on your capable shoulders.

Finally, the most crucial part of Generation Give is that it is run solely and completely by young people. It should be stressed that the committee should not be seen as a teacher/student relationship. Your youth mentor and even the guest speakers that visit will be treating you as colleagues. We are all equal in this programme.

Thinking about applying?

The other side of this page serves as our application for this programme. There are absolutely no restrictions on who in your school can apply. You may notice that the application is quite unique. We will not ask how you do in other classes, what awards or honours you have received elsewhere, or if you are in any other clubs. Additionally, you can answer the questions in whatever way you want, it is not necessarily an essay question (although essays are fine too!). Just express yourself in whatever way feels comfortable.

The whole point of this programme is to form a coalition of students that represents the people around them in their community, this means we are looking for a very broad range of personalities, skills and backgrounds. Plus, I promise, it is actually really fun.
